## Class- $A$

MONOPHONIC POWER AMPLIFIER

## $A-300$

Class A driven output stage with 20-parallel push-pull power MOS-FETs Large linear output $125 \mathrm{~W} / 8$ ohms, $250 \mathrm{~W} / 4$ ohms, $500 \mathrm{~W} / 2$ ohms, $1,000 \mathrm{~W} / 1$ ohm Instrumentation amplifier principle Current feedback amplification circuits Balanced Remote Sensing Double MCS+ circuit High damping factor of 1,000 Speaker output protection Highly responsive large-scale bar graph power meter
Connecting two pairs of A-300 supports bi-amping and bridged mode connection

## Accuphase's 50th Anniversary model embodies power amplifier perfection

Created to mark our 50th anniversary, the A-300 redefines the ideal for Class A power amplifiers. 20-parallel push-pull power MOS-FETs in the output stage improves performance by $25 \%$ over conventional models with outputs of 125 W int $08 \mathrm{ohms}, 250 \mathrm{~W}$ into $40 \mathrm{hms}, 500 \mathrm{~W}$ into 2 hms , and 1,000 W into 1 ohm that set the stage for enviable constant-voltage drive. The fully discrete balanced input amplifier achieves a level of quietness that will make you forget you are using audio equipment for reproduction. The A-300's unmatched expressiveness lets you enjoy the most exquisite pieces from the world's greatest composers.

## Groundbreakingtechnology

The A-300 employs sophisticated circuitry and hand-selected materials to create a power amplifier with well-honed expressiveness and cutting-edge technologies.

## Ample output power

The Class A driven 20-parallel push-pull power MOS-FETs in the output stage produce linear output power of 125 W into 8 ohms, 250 W into 4 ohms, 500 W into 2 ohms, and a tremendous $1,000 \mathrm{~W}$ into 1 ohm of maximum output power.

## Ultra low noise performance

Ideal gain distribution and other sophisticated techniques improve noise level suppression by $20 \%$ over conventional models.

## High damping factor

With a damping factor of 1,000 , the speakers can be driven with full control over the counter-electromotive forces to get the most out of your speakers.

## Ideal gain distribution

Noise level suppression has been dramatically improved by assigning a high gain ( $12.6 \times$ ) in the signal input section with excellent noise figure results.

## - Balanced remote sensing

Balanced remote sensing improves damping factor by feeding back the GND at the same time as the signal output from speaker terminals.

## Instrumentation amplifier

With balanced circuits in the signal input section, the amplification stage is comprised entirely of an instrumentation amplifier principle that equalizes input impedance on the + and - sides, for excellent external noise suppression, and providing optimal circuitry for this high-end audio amplifier.

## Impeccably Styled

## Impeccable Sound

## Advanced features

- Class A driven 20-parallel push-pull MOS-FET output stage
- 125 W into 8 ohms, 250 W into 4 ohms, 500 W into 2 ohms, and 1,000 W into 1 ohm large linear output power
- Instrumentation amplifier
- Current feedback amplification topology
- Balanced remote sensing
- Double MCS+ circuitry
- High damping factor of 1,000
$\square$ Meter display switching-(1)
- Digital power meter display range switching ...................(2)
- Hold time switching function that changes the meter peak display time(3)
- LINE / BALANCED input switching ..... (4)
- 4-step gain control ..... (5)
- Polarity switching of balanced input connectors ..... (6)
- Bridge connection switching ..... (7)
- Signal input section with a fully discrete configuration for low noise ..... -8- Speaker output protection circuit guards againstshort-circuiting(9)
- Large speaker terminals connected directly to protection circuitry ..... (10)
- Edgewise coils improve damping factor ..... (11)
Highly reliable MOS-FET switches with no mechanical connections ..... (12)
Large, high-efficiency toroidal transformer ..... (13)
- High capacity $100,000 \mu \mathrm{~F}$ filtering capacitors ..... (14)
- Aluminum hairline finish top plate ..... (15)
- Highly responsive large-scale bar graph meter and digital power meter ..... (16)
- High-carbon cast iron insulator feet with superior damping characteristics ..... (17)
- Power amplification section on circuit boards using glass cloth fluorocarbon resin ..... (18)

(8) Signal input section

(9) Protection circuit section
(B) Toroidal transformer
(44) Filtering capacitors
(I5) Top plate

## A-300 Guaranteed Specifications

| $\begin{gathered} \text { Rated Output } \\ (20-20,000 \mathrm{~Hz}, \\ 0.05 \%) \\ \hline \end{gathered}$ | Load | 8 ohms | 4 ohms | 2 ohms | 1 ohm |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Normal / bi-amping connection | 125 W | $250 \mathrm{~W}^{* 1}$ | $500 \mathrm{~W}^{* 1}$ | 1,000W*1 |
|  | Bridged connection | $500 \mathrm{~W}^{* 1}$ | 1,000 W*1 | 2,000 W*1 | - |

|  | Display range | $-\infty \sim+3 \mathrm{~dB}$ |  |  |  |
|  | Hold time | $1 \mathrm{sec} . / \infty$ switchable |  |  |  |
| Power Requirements | 120/220/230 V AC, 50/60 Hz (Voltage as indicated on rear panel) |  |  |  |  |
| Power Consumption | Idle | 230 W |  |  |  |
|  | In accordance with IEC 62368-1 | 270 W |  |  |  |
|  | Stand-by | 0.3 W |  |  |  |
| Maximum Dimensions | Width $465 \mathrm{~mm}\left(18.3^{\prime \prime}\right) \times$ Height $240 \mathrm{~mm}\left(9.4^{\prime \prime}\right) \times$ Depth $515 \mathrm{~mm}\left(20.3^{\prime \prime}\right)$ |  |  |  |  |
| Mass | Net | 46.0 kg ( 101.4 lbs ) |  |  |  |
|  | In shipping carton | 55 kg (122 lbs) |  |  |  |

- "Normal connection" indicates standard operation.
*1: Limited to music signals

## Supplied accessories

- AC power cord

Remarks
« This product is available in versions for 120/220/230 V AC. Make sure that the voltage shown on the rear panel matches the AC line voltage in your area.
$\star$ The 230 V version has an Eco Mode that switches power off after 120 minutes of inactivity.
$\star$ The shape of the plug of the supplied AC power cord depends on the voltage rating and destination country.
