

SUPER AUDIO CD PLAYER

DP-570S

Aug/2025 Engineering Dept.
Accuphase Laboratory, Inc.

The new DP-570S is a complete redesign of the DP-570 SA-CD/CD player released in November 2020. It is a next-generation SA-CD/CD player that has been significantly improved in terms of design, DAC performance, and USB DAC functionality through the use of the latest design technology.

●Improved DAC performance

- ES9028PRO Sabre by operating four DACs in parallel per channel.
- 12% noise reduction with ANCC-adopted circuits

⇒Guaranteed S/N : 121dB (DP-570: 120dB)

●Adoption of a newly designed disc tray

- The shape of the disc tray has been redesigned

⇒Discs fit securely in the correct position

- The surface of the tray is treated with gold anodizing

●Design incorporating the essence of high-end models

- The appearance has been refreshed by inheriting the design of the DP-770 in the disc tray panel and the left and right buttons

●Powerful power supply unit

- A newly designed large-capacity custom block capacitor (15000 μ F x2) is adopted to enforce the power supply ability(DP-570: 3300 μ F x2)

●Expanded USB input format support

- DSD 11.2MHz (DoP), DSD22.5MHz (ASIO Native) supported

Dimension : Width: 465mm, Height: 151mm, Depth: 393mm (Same as DP-570)

Mass : 18.4kg (DP-570 : 19.0kg)
